

# Aritra Lahiri

## Student

I'm a motivated and personable student pursuing a Computer Science Engineering at Budge Budge Institute of Technology (India) and eager to join Software Development as profession to help create efficient and beautiful applications to the customers . I've created some simple and medium sized projects as well. Though I'm a beginner but I'm quite excited to learn further. I do realize the value of time and believe in managing time as efficiently as possible.
